

# \$BOOMER On Base

(IF YOU'RE IN RUSH - CHECK THE HIGHLIGHTED AND SCROLL TO THE BOTTOM)

So, I bet you wonder why I decided to write the WHOLE doc about this ugly motherfucker:

Because after spending shit tons of hours following them, researching and sitting in their tg - it became one of my strongest conviction coins.

**Here's why:**

First of all it's not a deriv but a meme itself.

It started with a classic pattern: the token launched, 12 hours later dev rugged for peanuts and then the community took over.

Nothing special.

Then a group bonded, started growing, and turned into a real "die-hard" community.

Dev along with his team doxxed themselves and their wallets:

The screenshot displays a Google Hangouts interface. The top portion is a grid of video feeds. The first row includes three feeds: a man with a beard and headphones, a man in a cap, and a dark feed with a teal 'I' icon. The second row shows a man in a kitchen, a dark feed with a 'Vu' icon, and a man with glasses. The third row features a man in a cap, a man covering his face, and a man with headphones. The fourth row has a dark feed with a teal 'I' icon and a man with glasses. Below the grid is a row of smaller thumbnails, some with icons like 'I', 'T', and 'G'. At the bottom, a text chat area contains the message: "Day 1 of BOOMER LOL - we doxxed right away and we stayed up all night to save BOOMER. We jumped on Google Hangouts for 5 hour straight hours and thank the universe we did because the BOOME community is amazing!!!". To the left of the text is a heart icon, and to the right is a blue circle with the number '32' and a downward arrow.

Day 1 of BOOMER LOL - we doxxed right away and we stayed up all night to save BOOMER. We jumped on Google Hangouts for 5 hour straight hours and thank the universe we did because the BOOME community is amazing!!!

This day changed our lives!

Jesse Pollack, creator of Base and other Coinbase executives bought Boomer!!

We have shared vision.

We are just getting started.

Watch how big we will be this time next year.

I believe we will be in the billions!

We are 💎 diamond hands

I am publicly doxxing my my main/personal wallet because BOOMERS deserve:

A) **TRANSPARENCY:** I believe we have the highest probability of going to Billions market cap and I don't plan to move coins so why not let everyone track me (LFG BOOMERS 🔥)

B) **TRUST:** I believe BOOMERS deserve more transparency. Strap us onto the rocket ship 🚀 we are going to the moon, together 🌕

C) **SAFETY:** We are sick of the rugs! sick of the scams! sick of honey pots! We are going to do things differently here.

Nothing I say is ever financial advice. I am fortunate enough to be in a position where I can handle volatility. There are no expected returns. For full transparency I do have other BOOMER wallets but this doxxed wallet is my main/biggest bag that you can track to show I'm ride or die BOOMER.

That said, if anyone is going to the moon I believe it's going to be BOOMERS!!! I believe we can be the number 1 coin across all chains!!!

Petoshi: 0xc46346191f8fe043389144e934de0c7aab89c122

---

They're appealing to real life boomers and their community are real life boomers.

They even made a special section on their website explaining step after step how to buy it with links to full tutorials on their yt.

Vibes are great, people doxing themselves left and right showing their bags.

Lot of them hang there daily, casually talking with each other (not just spamming fucking retarded “PUMP” gifs like most other memecoin tgs).

Aside from that, their art is good and they’re making bounties/giveaways with \$ prizes, and are very active on socials.

From the technical side, all looks great and the only red flag which is bigger wallets has been addressed.

The meme itself is memeable and strong, since it’s a pack of stereotypes of an older person to which most of their audience can relate to.

I believe it will EASILY stand next to normie, toshi, and the ones that are going to perform in this bull run.

As always, don’t just mindlessly ape and do your own diligence.

This is the current chart:  
(27M MC at this moment)

## Summary

### Community:

- Big and active (4.800 tg | 5.600 X)
- “die-hard” community
- Great vibes, positive
- Contributes by making gifs/vids/graphics
- Pushing the project on socials

### Team:

- Doxxed with doxxed wallets
- Team works hard and pushes new things
- Very active on socials (engages with others, does spaces and Q&A's with other influencers like sibleth, posts daily)
- Constantly making new custom art
- All the time in tg talking with others

### Goal/Plans:

- Similar to \$NORMIE but with boomers:  
To safely onboard 10,000,000 boomers on base and have a fun time with people like them.
- Make an actual big boomer community

- Making a game
