

NYCEMF 2025 Shiner Tech Schedule (updated June 18)

Information regarding our soundcheck schedule in Shiner Theater is below. This schedule will be modified as information changes. Please check back for any updates to your scheduled time.

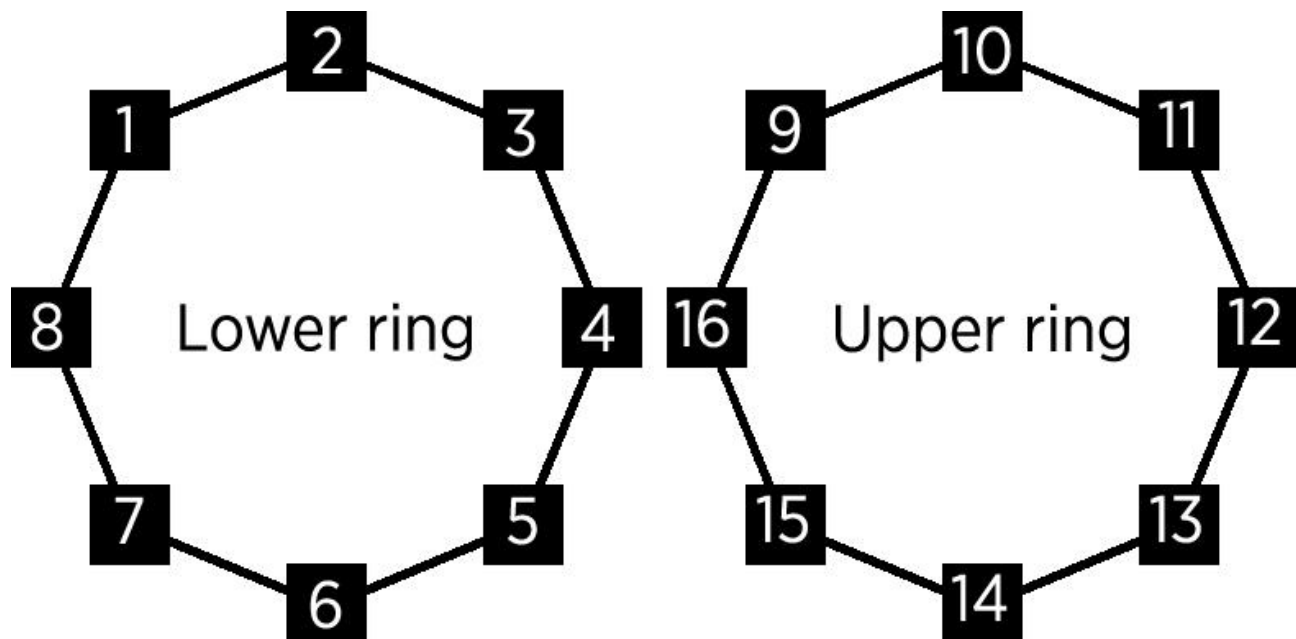

Shiner Theater will feature a 16-channel speaker array: a lower ring of 8 speakers and an upper ring of 8 speakers. Soundcheck times have been scheduled to allow composers to run their piece at least once and experiment with diffusing their pieces throughout the system. If you would like more time than you have been scheduled for, there is quite a bit of flexibility. Please send me an email.

Please arrive early in the event that we are running ahead.

I have made note of pieces by composers who I do not believe will be attending the festival. For those pieces, we will run a soundcheck either early in the day or earlier in the week as we have time on our own, thereby freeing up more rehearsal time for those who will be diffusing live. If your attendance status is noted incorrectly, please send me an email.
