

Selecting the Correct Jersey

Types of Jersey Fits:

- SPORT FIT is female / male specific: Designed for a body contouring fit.
- CLUB fit is Unisex: Designed to provide a relaxed comfortable cut with additional material around the middle. CLUB cut does not taper in at the waist. (Please note: if you do not want a form fitting jersey consider the CLUB/Unisex relaxed fit)

How to Measure for your Jersey Size:

The MAIN size you want hone is on, is the ½ - half Chest.

- Note the measurement of a jersey is sized from center point to center point of the side panel.
- At the top of the chart it explains how to size yourself to the Genesis Volaré series.
- Built in smaller increments this series gives you more choices.

WHY: Smaller increments between sizes dial in for better fit and comfort.

- Our cycling jerseys are not sized for body type but more for FIT.
- Not everyone has a seamstress tape measure.
- That is why we provide you the half chest size.
 - Lay your favorite t-shirt, cycling jersey or polo on a flat surface and use the sizing guide.
 - Measure armpit to armpit with a simple measuring stick to compare and find your size quickly. **This is the important measurement to begin with** (see attached image). It helps if you take a picture of your shirt that you are measuring now.
- **We stress you spent this extra minute to follow these instructions.**

Silicone Gel Grippy along the Hem: All jerseys come with a silicone gel grippy along the hem. We make smaller batches to accommodate more riders.

General Information:

- Our apparel is all one-off hand crafted specifically to your order and graphics. We cannot place it back in our stock.
- Please be aware of your timeline: 35 to 45 days to hand craft your new apparel.
- Mix and match your order with any quantity (sport or club / silicone gel grippy or no gel)
- We do not hold you to minimums within the Genesis / Volare series!

Recumbent Adaptive sports riders rejoice! We are the only company that offers these options. Follow the size chart and specify what style of pockets you want.

- Side Panel Style: Pockets are integrated on both the side panels. + Plus two zippered security pockets for your added protection. (4 total pockets)
- Up Front Style: Pockets positioned under the sternum provide for easy access up front. + Plus one zippered security pocket for your valuables. (3 total pockets)

Now as a team of ONE, you can grow!
