

Hello Victor,

The licenses for your course have been set up and deployed. Thank you for your support of Lumerical and the CUE program. The licenses are set up as individual, node-locked licenses, valid from **August 15, 2019** through **December 13, 2019** UTC.

Please have your students follow these steps to activate their licenses:

1. [Register on the Lumerical website](#) with their academic email address. Users who are already registered can [login](#) and proceed to Step 2. ***Please note that students will need to activate the software using their [unm.edu](#) email addresses***
2. To confirm the licenses and obtain an activation code, provide the link below to each student: [Go to Workshop](#)
3. Clicking the link will redirect students to the Workshop Portal. Once in the Workshop Portal, students will be asked to confirm their workshop registration.
4. After confirmation, the students will receive an email with the activation code and will be provided download links to download the relevant software tools. Users can visit the [customer download page](#) (when logged in) at any time to download their Lumerical tools. Each student must install the software tools on their own computer and use the provided activation code to activate the software.

Students can watch this video for more information on registering and activating their node-locked licenses: [Individual CUE License Installation](#).

You and your students will have free access to the courses offered through [Lumerical University](#) for the duration of their license entitlements (once registered and activated). Lumerical University offers work-at-your-own-pace modules designed to quickly acquaint users with Lumerical tools. The Lumerical Knowledge Base (KB) provides additional resources for installation support: [Knowledge Base: Installation and Setup](#). The Lumerical Knowledge Exchange (KX) is our online community to share ideas, ask questions, and learn the latest tips for getting the most out of the software tools. Access is available to all users, we encourage you to sign-on and join the conversation at <https://kx.lumerical.com>.

Please let me know if you have any questions.

Best regards,

Josh McLeod | CUE Program Manager
