

Cornerstone Learning Hub

Fall 2025

We're excited to offer a variety of in-person classes in the Pocatello area, with new topics introduced each semester!

Class Information:

- Classes are offered "à la carte," meaning you can sign up for each class individually, allowing you to register for as many or as few as you prefer.
- Classes run 1 hour a week for the entirety of a semester.

Cost:

- Registration fee (Deposit): \$50 (Per Class)
- Class Fee: \$150 (equivalent to approximately \$30 per month).

Refund Policy: Due to limited space, each registration may prevent another student from enrolling. Refunds are available up to 30 days before the start of class; after this period, no refunds will be issued.

- Receipts are available to help with reimbursement after the start of class from programs such as HomeEd360, Brain Tree, ect.

Feel free to contact me at any time and I would be happy to answer any other questions you may have:

- cornerstonelearninghub@gmail.com

Tuesday: K-2nd

Reading 9:00-10:00

Built on the scientifically-backed Science of Reading approach, this class is tailored to cultivate early literacy skills in young learners. We employ a mix of phonics, phonemic awareness, and fluency exercises, enriched with hands-on activities that make learning to read an enjoyable and rewarding experience. Our interactive lessons are designed to engage your child's curiosity and enhance their ability to decode words, comprehend stories, and develop a lifelong passion for reading. Perfect for setting a strong and joyful reading foundation!

Math Explorers 10:00-11:00

This class offers a dynamic environment where young learners can engage with fundamental math concepts through interactive games and hands-on activities. We cover a wide range of topics, from basic arithmetic to early geometry, emphasizing problem-solving and practical application. Tailored to accommodate the learning pace of each child, our approach helps students build a robust understanding of math, enhancing their analytical skills and fostering a positive attitude toward learning mathematics. Join us for a fun and educational journey into the world of numbers!

Animals and Their Habitats 12:00-1:00

In this exciting course, young learners will explore the fascinating world of animals and the diverse habitats they call home. From lush rainforests and vast oceans to arid deserts and chilly polar regions, students will discover how animals adapt to their environments. Through interactive activities, engaging stories, and hands-on projects, we encourage curiosity about wildlife and teach important ecological concepts. This class is perfect for fostering a love of nature and an understanding of the importance of environmental conservation.

Maps and Geography 1:00-2:00

This class introduces young learners to the basics of maps, continents, and key geographic features. Through interactive lessons, engaging crafts, and hands-on activities, students will learn how to read simple maps, understand cardinal directions, and explore the physical and cultural landscapes of different regions around the world.

Thursdays: 3rd-5th

Classroom City 9:00-10:00

Welcome to Classroom City, a unique course for 3rd-5th graders where students create and manage their own miniature city within the classroom! This interactive class combines elements of economics, civics, and practical math as students take on roles such as mayor, banker, and shop owner. They will learn about government structure, economic principles, and community responsibilities through real-life applications and problem-solving. Classroom City is not only fun but also a powerful tool for teaching financial literacy, teamwork, and leadership skills in a dynamic and engaging environment.

The World of Mythology 10:00-11:00

Dive into the mystical and mesmerizing World of Mythology with our class designed for 3rd-5th graders! This course explores ancient legends and myths from cultures around the globe, including Greek, Norse, Egyptian, and Native American mythologies. Students will discover the gods, heroes, and mythical creatures that shaped cultural narratives and understand the morals and messages these stories convey. Through creative writing, dramatic reenactments, and art projects, students will engage deeply with these timeless tales, developing their reading comprehension and storytelling skills.

Culinary Quickstart 12:00-1:00

Culinary Quickstart is an exciting, fast-paced cooking class for 3rd-5th graders designed to introduce the basics of cooking and nutritional science in just one hour per session. Each class features a different recipe that teaches essential culinary skills, from measuring and mixing to sautéing and serving. Students will not only learn how to prepare simple, delicious dishes but also gain an understanding of healthy eating habits, food safety, and the science behind cooking. It's the perfect way to combine life skills with fun, hands-on learning.

Art Around The World 1:00-2:00

This class invites students to embark on an artistic journey that spans continents and cultures. Students will explore a variety of art forms and techniques that reflect the rich tapestry of global art traditions. Through hands-on projects and creative explorations, they will develop their artistic skills and deepen their appreciation for the diverse ways people express creativity around the world. Join us for a colorful and inspiring exploration of art from across the globe!
