What is RHA dermal filler

RHA is an injectable gel (also called a dermal filler) used to treat facial wrinkles and folds especially between the nose and corners of the mouth called the nasolabial folds, although other areas include the lips, marionette lines, cheeks, and fine lines around the mouth. RHA is produced with a non-animal source hyaluronic acid (HA) using an advanced technology to obtain a soft and long lasting injectable HA gel to smooth facial wrinkles and folds. RHA contains a small amount of an anesthetic medicine (lidocaine), to help reduce discomfort during injection.

How does RHA dermal filler work?

RHA dermal filler is injected into your skin under the dermis to plump or smooth away facial wrinkles and folds. This plumping and smoothing effect has been shown to last up to 12 months although duration of RHA filler may vary between individual clients. RHA is not a permanent dermal filler gel as it slowly disappears while the body absorbs the HA gel. Therefore, the smoothing and plumping effect will gradually go away.

What RHA dermal fillers are offered at the Medical Spa at Mansfield Cosmetic Surgery Center?

Our Medical Spa offers the full line of RHA dermal filler products including RHA Redensity, RHA2, RHA3, and RHA4. Basically, the RHA Collection offers four separate HA-filler formulations. RHA Redensity is a weightless filler that smooths delicate lipstick lines. RHA2 and RHA3 offer elegant and refined smoothing for those seeking a soft, natural look in wrinkles and folds. Lastly, RHA4 provides natural volume for deeper areas of dynamic wrinkles and folds.

Redensity “Softest”

Weightless filler used to smooth superficial, delicate lines

Example: Lipstick lines or smoker lines around mouth.

RHA2 “Softer”

Refined smoothing for dynamic wrinkles and facial folds

Example: Superficial nasolabial folds, under eye tear trough deformity

RHA3 “Medium”

Elegantly enhance lost volume and achieve a softer appearance

Example: Lip augmentation, marionette lines, commissure lines, deep nasolabial folds

RHA 4 “Firm”

Natural-looking definition and volume to the deeper dynamic wrinkles and folds

Example: Volume loss at the cheeks

Company Description

Mansfield Cosmetic Surgery Center, under the directorship of Dr. Michael L. Thornton, provides various procedures in Facial Plastic Surgery, Breast Cosmetic Surgery, Body & Buttock Contouring, SculpSure® Non-Invasive Fat Reduction, Male Cosmetic Surgery and Non-Surgical Aesthetics from our Medical Spa.
