

Proto-Mokánm

Rule 1: remove the first letter of each word

Example: hi im a monke = I m a onke

Rule 2: if there's a vowel by its self in the sentence put an e next to it. this is called a skewed vowel. (it counts as one letter and doesn't count as a regular vowel)

Example: i m ae onke

Rule 3: remove spaces

Example: imaeonke

Rule 4: for every vowel(a,e,i,o,u) put a space after it

Example: I maeo nke

Rule 5: after every word put ' after it

Example: I' m'ae'o nke'

Detailed Example: normal sentence hi im a monke would be turn into hi' im' a' monke' then to Mokánm would be I' m'ae'o nke'

Rule 6: add ' after the sentence and then add (ca) after the '

Example: I' m'ae'o nke'ca

Rule 7: add all the missing letters after the ca in order

Example: I' m'ae'o nke'cahim
