

NYCEMF 2025 Loreto Tech Schedule (updated June 24)

Information regarding our soundcheck schedule in Loreto Theater is below. This schedule will be modified as information changes. Please check back for any updates to your scheduled time.

These soundcheck times are designed for tech setup, troubleshooting, and setting balances in the hall. There will not be extensive time for rehearsal, particularly if we encounter any problems with your setup. If you anticipate needing more time than you have been scheduled for, there is some flexibility - particularly in the afternoons prior to the 8pm concerts.

Please arrive early in the event that we are running ahead. Any composer or performer with equipment to set up should plan on arriving early enough to have everything set up and ready to go before their scheduled time.

I have made note of fixed media pieces by composers who I do not believe will be attending the festival. For those pieces, I will run a soundcheck either early in the day or earlier in the week as I have time on my own, thereby freeing up more rehearsal time for those with live performances. If your attendance status is noted incorrectly, please send me an email.
