

## When Use the Perfect Subjunctive?

Perfect subjunctives are used whenever the *main verb* (verb of the **main/independent** clause) is **present**, **future**, or **future perfect**. In grammar terms, this means that we use the perfect subjunctive in **primary sequence** (like the present subjunctive).

The perfect subjunctive always describes something that has already happened. As such, it is typically still translated as **\_\_\_\_\_ed** like a normal perfect verb.

## Spotting The Perfect Subjunctive

The perfect subjunctive is formed off of the perfect stem and uses the marker **eri**. The perfect subjunctive also uses the **normal** subject endings. This means that most of the time the perfect subjunctive is identical to the **future perfect indicative**.

<i>cum <b>cucurrerim</b>, canis me oppugnat.</i>	<i>Since <b>I ran</b>, the dog is attacking me.</i>
<i>cum militēs <b>fugerint</b>, manēmus.</i>	<i>Although the soldiers <b>fled</b>, we're staying</i>
<i>nesciō cur hanc <b>fēcerint</b>.</i>	<i>I don't know why <b>they did</b> this.</i>

## Forming the Perfect Subjunctive

The perfect subjunctive is formed by the same process that we form other perfect-stem verbs:

**Perfect Stem + eri + Personal Ending**

### Examples:

they asked <i>rogō, -āre, -āvī</i>	<b>rogāv</b> <i>rogāvī</i>	+	<b>eri</b>	+	<b>nt</b> they	=	<b>rogāverint</b>
I had <i>habeō, -ēre, -uī</i>	<b>habu</b> <i>habuī</i>	+	<b>eri</b>	+	<b>m</b> I	=	<b>habuerim</b>
you ran <i>currō, -ere, cucurrī</i>	<b>curr</b> <i>cucurrī</i>	+	<b>eri</b>	+	<b>s</b> you	=	<b>cucurreris</b>

## Perfect Passive Subjunctive

Like all other perfect passives, the perfect passive subjunctive is formed using two words: the 4th Principal Part (PPP) + **the subjunctive of esse**. Remember that the subjunctive of **esse** always contains the letters **sī**.

## Forming the Perfect Passive Subjunctive

### 4th PP (PPP) + Subjunctive of esse

#### Examples:

<b>I was known</b> <i>sciō, -īre, -īvī, scītus</i>	<b>scītus</b> <i>scītus</i>	+	<b>sim</b> I	=	<b>scītus sim</b>
---	--------------------------------	---	-----------------	---	-------------------

---

<b>she was held</b> <i>teneō, -ēre, -uī, tentus</i>	<b>tenta<sup>1</sup></b> <i>tentus</i>	+	<b>sit</b> she	=	<b>tenta sit</b>
--	---	---	-------------------	---	------------------

---

<b>they were asked</b> <i>rogō, -āre, -āvī, -ātus</i>	<b>rogātī</b> <i>rogātus</i>	+	<b>sint</b> they	=	<b>rogātī sint</b>
--	---------------------------------	---	---------------------	---	--------------------

---

<sup>1</sup> Remember that whenever you use the 4th Principal Part, you need to GeNuCa it to the subject! Here, since the subject is *she*, **tenta** needs to be feminine.
