|---------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <p><b>What are the 4 stages of the water cycle?</b></p> <p>Evaporation, condensation, precipitation, collection</p> | <p><b>What is evaporation?</b></p> <p>The water changes from liquid to gas because of the heat of the sun</p>                           | <p><b>What is condensation?</b></p> <p>The water changes from gas to liquid because it rises into the atmosphere and cools.</p> |
| <p><b>What is precipitation?</b></p> <p>The large drops fall from the clouds as rain and snow</p>                   | <p><b>What is collection?</b></p> <p>Rain (precipitation) collects in rivers, lakes, and underground, and travels to sea and oceans</p> | <p><b>What creates waves?</b></p> <p>The wind</p>                                                                               |
| <p><b>What is the word we use to talk about the water in oceans that goes up and down?</b></p> <p>Tide</p>          | <p><b>How do we say when the water in the beach is up?</b></p> <p>High tide</p>                                                         | <p><b>How do we say when the water in the beach is down?</b></p> <p>Low tide</p>                                                |
| <p><b>What is the source of the river?</b></p> <p>It is the place where the river begins.</p>                       | <p><b>What is the mouth of the river?</b></p> <p>It's the place where the river ends.</p>                                               | <p><b>What is a tributary?</b></p> <p>It is a river that flows into another river.</p>                                          |
| <p><b>In what part of the river is the source?</b></p> <p>It's in the upper course</p>                              | <p><b>In what part of the river is the mouth?</b></p> <p>In the lower course</p>                                                        | <p><b>What 5 main Spanish rivers end in the Atlantic ocean?</b></p> <p>Miño, Duero, Tajo, Guadiana, Guadalquivir</p>            |
| <p><b>What 3 main Spanish rivers end in the Mediterranean Sea?</b></p> <p>Ebro, Júcar, Segura</p>                   | <p><b>What is the longest Spanish river (without taking into account Portugal)?</b></p> <p>It's the Ebro river</p>                      | <p><b>What is the longest river of the Iberian Peninsula?</b></p> <p>It's the Tajo river</p>                                    |
