

41ST IRVINE UNIFIED SCHOOL DISTRICT ANNUAL SCIENCE FAIR

Sponsored by

In Partnership with

The 41st Annual IUSD Science Fair will be live on [IUSD.org](https://iUSD.org) on January 24, 2022! Visit [IUSD.org](https://iUSD.org) starting on January 24th to view our incredible student projects!

This year, IUSD students in Grades 6-12 had the opportunity to explore their STEM passions through participation in IUSD's 41st Annual Science Fair. Students who chose to participate submitted a Google Site containing a digital presentation, video, and excerpts from their project logbook.

A virtual fair will be hosted on [IUSD.org](https://iUSD.org) from January 24-February 4, 2022. During this time, all projects will be available for public viewing. Also, during this time, projects will be judged by community members who work in STEM professions. An awards ceremony celebrating all participants is scheduled to be held in-person at University High School on February 15, 2022. Students whose projects are chosen to advance to the 2022 Orange County Science and Engineering Fair (OCSEF) will be notified by February 4, 2022. Registration for projects advancing to OCSEF must be completed by February 15, 2022.

Did you know? Each year, approximately one-half of the first place winners at the Orange County Science and Engineering Fair are IUSD students who participated in the IUSD Science Fair.

Please encourage all students and families to view our incredible students' outstanding projects on [IUSD.org](https://iUSD.org) from January 24-February 4, 2022. And, please take time to congratulate all participants.
