web development

960 Grid Activity

The Elements and Principles of Good Web Design.
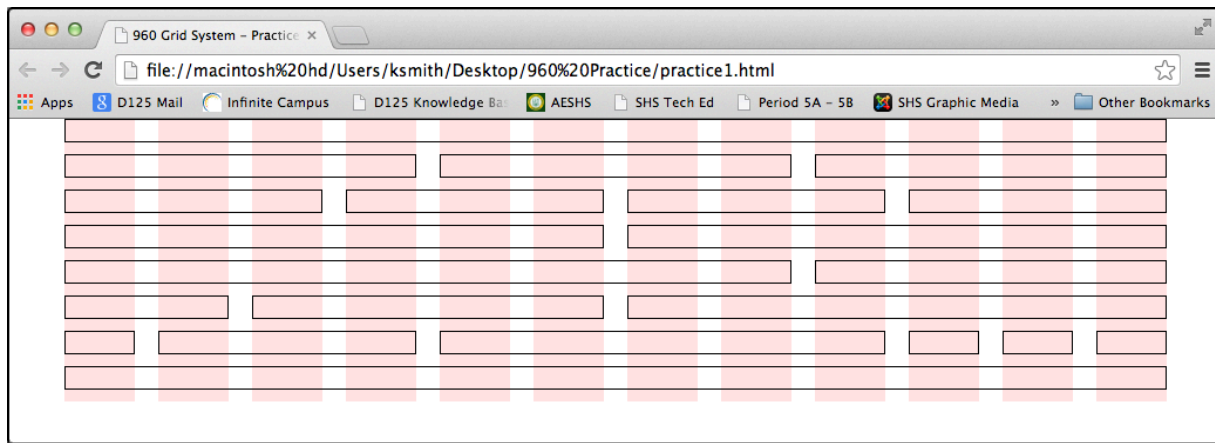

Directions: Using the 960 Grid System, recreate the two example webpage layouts.
1. Download the .zip files for this activity.
2. Open the files called "960GridActivity1.html" and "960GridActivity2.html" in Dreamweaver.
3. In each file, link the two .css files by adding the following code in the head section of the webpage:

```
<link rel="stylesheet" type="text/css" href="css/960.css" />
<link rel="stylesheet" type="text/css" href="css/reset.css" />
```

4. In each file, set up the container for a 12 column grid by adding the following code to the body section of the webpage:

```
<div class="container_12"></div>
```

5. In the file called "960GridActivity1.html", recreate the layout shown below. In order for the div to show, add a non-breaking space between a paragraph tag inside the div tag. For example:

```
<div class="grid_12"><p> </p></div>
```

6. In the file called "960GridActivity2.html", recreate the layout shown below. You will need to use the suffix and prefix classes. For example:

```
<div class="grid_4 suffix_4"><p> </p></div>
```
