## Rule things

1. due to motivation or personal things that may get me busy at home, i still live with my mum, might have me take a while to finally get to your art, so I might take a week or a month to finally start your piece, if you think I forgot about it anyway it's okay to remind me, I allow deadlines now too but I prefer they're at least a week away minimum
2. Paypal only commissioners will have to commission me through ko-fi usually but I made a new account I hope stays up, you can commission me @goatlett on PayPal if that's the only payment app you got
3. i will put clients lower on priority if i feel they weird me out some way
4. No refunds if i feel im mostly done on the art already
5. I don't accept check only comms, had too many people try to scam me over that so leave me alone if you try to do that
6. I don't draw particularly great so the anatomy and other things may not look how you'd expect, please acknowledge my art isn't super great before considering me if you have high expectations, although I can try to make my art look decent but I might charge for more working time on the piece, unsure about that though as I'm still figuring out fair prices

## Do and don't draws

I can mostly do: furies, most kinks, and simplified mecha like bland tv head characters that arent very detailed

I can sort of do?: feral arts and maybe humans

I can't do: complex mechs

## Some examples

I'm gonna rework this to be in order of most recent to old, maybe
