

## **Gen-AI and AI-Driven Tools Usage Policy**

This policy has been implemented in response to the rise of generative AI and AI-based technologies, which are expected to be used more widely by academic writers and content creators. Generative AI refers to AI systems that can generate new content, such as text, graphics, or music, while AI-based technologies cover a wider range of applications that utilise AI to analyse data, automate processes, and support decision-making. This policy aims to provide transparency and guidance to authors, reviewers, and editors/copyeditors/proofreaders at the *Kajian Jurnalisme*, and the journal monitors these changes and adjusts its regulations as necessary.

### **For Authors:**

*Kajian Jurnalisme* prohibits the use of Generative AI for writing manuscripts. Authors may use AI to assist with paraphrasing or proofreading, but our journal requires that the use of AI for these activities be no more than 20% when examined using Turnitin.

### **For Reviewer, Editor, Copy Editor, and Proofreader:**

Manuscripts submitted to the *Kajian Jurnalisme* are confidential. Therefore, reviewers, editors, copyeditors, and proofreaders are strictly prohibited from uploading manuscripts to Gen-AI or AI-Driven Tools to assist in the review, editing, or proofreading process.

*Kajian Jurnalisme* supports the usage of technology that strengthens the integrity and efficiency of the editorial or peer-review process while complying with the principles of confidentiality and protecting the rights of all parties involved. This policy is subject to change in accordance with the rules governing the use of AI in academic environments.
