ESCAPE WP2 3rd workshop (proposal)

Draft agenda being built here: https://indico.in2p3.fr/event/26307/

- Date: TBD (~2nd or 3rd week of March): poll ongoing
  - https://doodle.com/poll/uxyz29yzxc4gxwf4?utm_source=poll&utm_medium=link
- Format: virtual meeting. Three half days.
  - Idea to have 2 main "blocks":
    - **Session-A**:
      - Experiment Vision: DAC21 take-aways.
        - What was executed?
        - How did it work?
        - Conclusions especially pointing to further improvements.
        - Plans for the experiment to continue exploring, adopting or dismissing the tools, models and technologies exposed in WP2 and ESCAPE
          - Any barriers to adopt DL model and tools
      - Long term support? if needed for the services being used… => Collaborations to be built? Community efforts?

    - **Session-B**:
      - Task leads vision: overall evaluation of the DAC21 based on the workflows executed by the experiments
        - What is your take towards consolidation of the infrastructure and tools on different scenarios: central service@EOSC, experiments "private" deployments, etc.
      - WP2/ESCAPE vision towards long term sustainable activity and synergies with ongoing funded projects, sciences clusters and national computing initiatives
        - Inc. HPCs
      - **WS summary and plan preparations of the final deliverable**
    - Something else?
      - **Security** matters in deploying DL services, ports, access, etc.
      - **Infrastructure/services "inventory"**, explore options for the future: synergies, collaborations, common initiatives, setting up the right forums discuss/follow-up
      - **Input and vision from services:** how they see the future in view of ESCAPE experience and impact. **Development efforts** to adapt for "new" use cases: many small files, metadata extensions,...
        - **Rucio (Martin, Rob)**
        - **ESCAPE/IAM**?
        - FTS?
        - CRIC?
        - DLaaS?

- ○ Monitoring?

- **Scientific support team**:
  - ○ Minutes, moderation, zoom control, timing, etc.
  - ○ Volunteers please?
    - ■ Xavier Espinal
    - ■ Rosie Bolton
    - ■ SKAO can offer administrative support (zoom room, waiting room management, support for indico site)
    - ■ Fabio Hernandez
    - ■ Yan Grange
    - ■ Aleem Sarwar
- ● Invitations?
  - ○ EOSC-Future SP community? all other ESCAPE WPs? Others?
    - ■ Invite real "Scientists" from the experimenting using the tools (first hand)
    - ■ Identify whether invite people depending on the session (need to give it a thought)
    - ■ ScienceMesh/ESCAPE checkpoint, LOFAR PoC. Progress on Reva integration in different storage platforms (Ron)
