

The Learning Scientists
Reading 1C (Part 2) - Due Friday

Learning Targets:

1. Identify and craft example of the 6 principles of learning.
2. Utilize the principles of cognitive psychology to improve your study skills.

Directions: Watch the "How to Study Effectively for School" video and complete the chart below. After completing the chart, please answer the reflection questions and choose two blog articles to read.

Principle	Description	Application: How could you use this principle to study for your Unit 1 test?
Spaced Practice		
Interleaving		
Elaboration		
Concrete Examples		
Dual Coding		
Retrieval Practice		

Reflection:

1. Think back to how you said that you have studied for tests in the past, have you used any of these strategies in the past? Please explain.

2. Choose 2 of these principles to help you prepare for our Unit 1 exam and set 2 goals for yourself. BE SPECIFIC! Tell me the when, what, where and how of your plan.

Learning Scientist Blog Post: The Learning Scientists have created an AWESOME blog! You can find it at <http://www.learningscientists.org/blog/>. Choose ANY TWO posts that you find to be interesting or applicable to your life and complete the charts below.

Blog Information	Summary	Connections to MEMORY	Application to YOUR life.
