### Quiz #2 Retake Assignment: Graph Quadratic Functions

In order to earn a higher score on your quiz (4 max), you must complete the three sections below: Reflect, Review, and Return. You must print and complete this page using your original test. You will attach this completed page with the original test when you come in to retake the test. You will attach the corrections to the packet. You will also attach the additional practice (if you chose to do the additional practice to help you study).

#### Reflect

1. For each resource below, place a check for which descriptor best summarizes your use of the resource.

Resource	Used this resource well in my learning	Used this resource, but could use it better in the future	Did not use this resource but I will try to use it in the future	Did not use this resource and do not plan to in the future
Notes Packet				
Asking peers for help				
Asking teacher for help				
Homework				
Tutoring (provided by teacher, peers, online, or private)				
Extra Resources provided by your teacher (Khan Academy, Parent Guide)				

#### Review

2. What score did you earn on your original quiz?

3. Correct all the mistakes you made on the original quiz

- You will make the corrections on a separate sheet of paper.
- Feel free to get help from your teacher, peers, tutor, family member, friend, or any other resource.
- If you lost your original quiz, ask your teacher for a new blank one.

4. Come into tutoring Mondays or Wednesdays at lunch to have Mr. Fernando confirm you corrected all the mistakes on your test.

5. OPTIONAL: To prepare for the quiz, study the [Additional Practice Problems](#). If you are completing the additional practice to help you study, please print and complete and attach to the retake packet.

#### Return

6. Come to Mr. Fernando's room either: Tuesdays after school or Thursdays after school. Turn in this completed worksheet, original quiz, quiz corrections, and/or completed additional practice problems. Your teacher will then hand you a new quiz for you to retake.
