

Memory

Instructions

Watch the [video about bundles](#).

This bundle was created to edify and support your research interests. Recommended resources have the first word of the reference highlighted with light text over a dark background (e.g., **Akbarian**).

Some of the links go to research paper vendor sites with just the abstract available. To read the full article, sign in to [HOLLIS Library](#) and do the title search there.

Keywords in search: amygdala; learning + memory; attention + memory; children + memory; collective memory; consciousness + memory; Hebbian synapse; hippocampus; long-term memory; memory + decay; forgetting; memory brain neural mechanisms; memory; neural mechanisms + forgetting; neural mechanisms + memory; neuronal mechanisms + memory; sleep + memory; synaptic plasticity; training + plasticity + working memory; unconsciousness + memory; false memories; working memory + attention + multitasking; working memory

If you wish, you can [download this bundle](#).
