

Title

Here I put a working title for the project.

Rationale/Purpose

- Most relevant background information or citations
- Rationale
- Purpose statement

Sample

- Sample size
- Age group, health status, etc.

Approach

If the study is looking at associations or group differences, I describe the predictor or exposure variable and the outcome variable and how each were/will be measured. If the study is using existing data (e.g., NHANES), I put in some descriptive data about the distributions, variables names, etc. If the study is descriptive or methodological in nature, I would briefly describe/bullet the overall approach.

Planned Analysis

Describe how data will be reported and/or the planned statistical analyses.

Planned Dissemination

Indicate a target conference, journal, or audience to which you plan to disseminate findings.
