The policy will be reviewed each quarter to determine if it is still needed, and renewed based on that determination. This review will be undertaken by the Kingdom Seneschal, in consultation with the Crown, and the data will be shared with the Witan. The review will be undertaken based on data, and will not be left up to whim or conjecture. For the purposes of this review, the data will be provided by the COVIDActNow real-time tracker, or similar system, which compiles data about risk based on multiple metrics. The overall risk shall be determined based on a combination of Daily New Cases per 100k, Infection Rate, and Positive Test Rate averaged over the quarter. The metrics collected will be across all five states which make up the Kingdom of Calontir. If the overall risk in all states (Arkansas, Iowa, Kansas, Missouri, and Nebraska) reaches "Medium" or below for two consecutive quarters, the policy will be suspended. If the overall risk level exceeds "Medium" in any of the states which make up the Kingdom of Calontir, then the policy will be reinstated.

Risk Levels Defined
Daily New Cases per 100k:
Severe risk = Greater than 75
Very high risk = 25 - 75
High risk = 10 - 25
Medium risk = 1 - 10
Low risk = Less than 1

Infection Rate:
Very high risk = Greater than 1.4
High risk = 1.1 - 1.4
Medium risk = 0.9 - 1.1
Low risk = Less than 0.9

Positive Test Rate:
Very high risk = Greater than 20%
High risk = 10% - 20%
Medium risk = 3% - 10%
Low risk = Less than 3%
