## The Dark Side of the Moon.

Space tourism, while exciting, comes with several significant shortcomings. First, the cost is exorbitant, putting this adventure out of reach for most people. A compelling evidence is that the technology, though advanced, remains risky with potential hazards during launch and re-entry. Additionally, Passengers face physical challenges like intense G-forces and the effects of weightlessness on the body , the limited space aboard the shuttle means comfort and privacy are minimal and medical emergencies in orbit pose serious difficulties due to limited resources. therefore, not everyone is suited for the physical and mental demands of space travel. Still we need to mention that the duration of trips is still short, leaving little time to truly explore or unwind. What's more, The environmental impact of rocket launches is another growing concernCurrently, space tourism lacks widespread accessibility, making it exclusive rather than inclusive. Many argue that the billions spent improving this industry could be better used to fight hunger or find cures for fatal diseases.Despite the allure, these drawbacks highlight that space travel is far from an easy

getaway.

## Letter of Complaint.

Dear Sir/Madam,

I am writing to express my deep dissatisfaction with the package tour I recently took with your companyto Marrakesh , which fell far below my expectations and the promises made at the time of booking.

To begin with, the **accommodation** provided was substandard—rooms were poorly maintained, unclean, and far from the quality described in your brochure. Moreover, the **tour was significantly delayed** at the start, causing major inconvenience and disrupting our entire itinerary.

Throughout the trip, we were subjected to **poor service** from both the tour staff and hotel personnel, who were unhelpful and at times even rude. The **food offered was insipid and repetitive**, lacking both quality and variety. On top of this, we were asked to make several **unexpected extra payments** for services that were supposed to be included in the original price.

Given the numerous issues experienced during the tour, I believe a **full refund** is not only fair but necessary. I request that this matter be resolved promptly. Please confirm receipt of this letter and inform me of the steps you will take to process my refund.

I look forward to your swift response.

Yours faithfully,

**In many cases**, syllabuses are outdated and not tailored to real-world applications.

**Even more concerning**, corporations may exploit this data for profit without proper consent.
**At the same time**, advanced surveillance tools are tracking citizens without them knowing.
**Although technology brings convenience**, it frequently strips us of digital autonomy and control.
**To counter these threats**, governments must enforce stronger global privacy protection laws.
**Just as crucial**, companies should be transparent and ethical in their handling of user data.
**On top of that**, digital literacy must be taught to help people protect their online identity.
**By balancing innovation with regulation**, we can ensure tech works for, not against, our rights.
