

Watershed Challenge

Action Plan Template

Henrico County Public Schools

What is a problem that you found in your outdoor space?

How do you think this problem could be resolved?

What could you do to help resolve this problem or bring awareness to the problem?

Possible Ideas: (Remember these are just ideas, feel free to use your creativity)

- Try to resolve the actual problem (depending on the problem, this may involve adding vegetation, gravel, and visit http://baybackpack.com/schoolyard_projects/ for ideas)
- Create a Public Service Announcement to bring awareness
- Write a motivational message to your community to help bring awareness to the problem
- Make a poster with imagery to show the problem and why we should care (include the plants and animals that are affected)

What should you research prior to starting your project?

What supplies will you need for your project?

Who could help you with your project? Another member of your household?

Remember to share your ideas by either emailing in photos or tweeting!
