

Essex Road corridor TfL proposed cuts

This bus corridor is currently served by the following 10 bus routes: (4, 19, 30, 38, 43, 56, 73, 153, 341 and 476).

Proposed changes and alternative bus links include:

Route 4 Withdrawal:

- The current route would no longer run between Archway and Blackfriars Station.
- On the northern section of route 236, it would be extended to Archway on the current 4 routing, therefore replacing route 4 links between Archway and Highbury Grove. On the eastern section of 236 (outside of Islington), the service currently terminates at Hackney Wick. This would be cut back to Homerton Hospital.

Route 56 restructure:

- The current route runs between Whipps Cross Bus stand and St Paul's station via Essex Road, Angel and Clerkenwell Road.
- 56 would be extended from St Paul's Station to terminate at Blackfriars Station to cover the links to Blackfriars Station.

Route 476 restructure:

- The current route runs between King's Cross and Northumberland Park via Angel, Essex Road and Newington Green.
- The network change is to cut back 476 from King's Cross to Newington Green (it would run from Newington Green to Northumberland Park).
