

An entire ensemble of [Rod Pectumimus 'Nymphs'](#) for sale! These are some smaller ones I've made for people with a little less pocket money. It also lets me go a little harder since they're less complex line art to start with.

Each simple Nymph is \$15 each and comes as a clean image with no watermark on it. As long as it's not for commercial gain, you can do whatever you want with them after purchase. That includes tweaking the designs to your liking. Just keep in mind that if you want to do any super major changes (giving them extra limbs, making them fully feral, etc etc), you might be better off turning them into something else.
