References

The bibliography in research articles and conceptual ideas contains all the references used in the study. References that may be referenced are published in the last 10 (ten) years, except for certain references (books) that have not been republished in the last 10 years. The composition of the bibliography is highly recommended in the form of primary sources (80%) namely national journals, international journals, theses, dissertations, conference proceedings both nationally and internationally. Other sources (20%) can be books or other reference sources. Each article must contain at least 15 (fifteen) references and only references used as citations may be listed in the Bibliography.

Writing a bibliography in the journal Pancasila: Jurnal Keindonesiaan uses the same style as the quote, namely the American Psychological Association 6th Edition style. Please use Reference Manager Applications like EndNote, Mendeley, Zotero, etc. Use other published articles in the same journal as models. All publications cited in the text should be included in the References section and arranged alphabetically. For example:
