

## Lenovo Laptop is on, but the Screen Black

If the Lenovo screen goes “black” **OR** if the mounted projector screen goes “black” (and you know that the laptop is on), then

1. On your Lenovo keyboard press the **Windows** key and the “**P**” key together

2. Description of what each type means:

- a. **PC screen only**: The Desktop is only on your laptop. It will not appear on any other screen.
- b. **Duplicate**: The Desktop will be projected on your laptop and on the other screen.
- c. **Extend**: The Desktop will be visible on your laptop screen. And you will have additional Desktop space to view other windows.
- d. **Second screen only**: Your laptop will be black and it will only be visible on your other screen.
