Agenda:

- Switch to OSBAPI zoom: https://pivotal.zoom.us/j/738845880 ?
    - No objection
- Alignment on short-/long-term evolution
    - What can we do short vs long term?
    - E.g. minor tweaks to OSBAPI vs starting from scratch
    - Have a “running doc” of things we notice during our design sessions for things that we would like to address long term.
    - **AI: Florian** - setup the initial google doc for tracking
- Review of specification document
    - Florian - still TBD
- Florian: Status update from SAP’s implementation team (https://github.com/Peripli)
    - SAP needs an impl ASAP
    - First draft of spec should be in github for next week
    - Needs APIs defined **now**
- Matt: Fix https://github.com/cloudfoundry/cloud_controller_ng/issues/837
    - Working on a proposal doc
    - Should be available within a few weeks
- Doug**:** Advertise work and results back to OSB group
    - Now? Wait?
    - Wait at least another week - perhaps until we have a draft spec/outline
    - Will revisit on next call
    - Florian: adding other people
        - Invite everyone from OSB API WG when we announce it there
- Doug: we have a use case where the person who didn’t initiate the create of an instance can update/delete it
