

THE FUTURE JOB

One of the most difficult problems a young person faces is deciding what job to choose. Choosing a career is not a simple matter. It is very difficult and responsible to make a serious choice of the future occupation.

When people choose a profession they should consider different factors: their abilities, personal qualities and skills, likes and dislikes. They also should think about work conditions and work environment. For example, I would prefer/would like/ want... but I don't want...

- to have a part-time job/full-time job/9-5 job;
- to work day/night shift; long hours/overtime/
- at the weekends;
- to work from home/to have distant work;
indoors/outdoors;
- to work with hands;
- to work in a team, on my own
- to wear a uniform/suit at work;
- to travel a lot; to go on business trips

I'm interested in/keen on/fond of/enjoy...

Physics/Chemistry/Medicine/Literature/Art/Music...

So, in my opinion, the profession of ... will be good for me. (+say what you will do)

I think, this is a worthwhile profession because it

- is useful for other people
- is interesting and exciting; unusual and modern
- brings good money
- gives me opportunities to travel/ communicate
with people/ help other people(animals)/ use new
technologies/create/ invent something ...

I hope I will succeed in the career of a ... because I'm

hard-working, well-organised, accurate, patient, reliable, responsible, decisive, determined, enthusiastic, energetic, creative, sociable, brave, caring, friendly, polite

In conclusion, I'd like to say, that I'll do all the best to be a good specialist.
