

UPDATED:

(Thought I should mention the SL for all these emails are “For (and then their name)”

Should I change it and add more or is that good?

Hi <Name>,

I came across your reviews and saw what you did for <Name of the person who left a review and short description of what they said making it specific> it's clear your patients value the care you provide.

Many practices struggle to consistently attract local patients ready to book care. By optimising visibility for the exact keywords potential patients were searching for, I recently helped a client rank in the top 2 on Google, generating qualified inquiries and driving measurable growth in just 1-2 months

I'd love to show you how we can achieve similar results for your clinic. Would you be open to a quick chat?

Best regards,
Lutchee
