

Coasters

2/07/25

So far we have cut the coasters and bases to size on the table saw, lasered the coasters, and cut and glued the side pieces. We have also glued and then nailed the side pieces to the bases to complete the holders. We have 8 total holders and 24 lasered coasters. We still need to fill the nail holes as well as stain the holders and coasters.

3/14/25

We have made more coasters and holders and started the waterproofing process.

4/28/25

We finished 16 sets of coasters and poured some epoxy coasters, but couldn't figure out how to sand them without it smudging.

5/30/25

Made 20+ sets and sold 20 with leftover coasters and one leftover set that is in poor quality. We also wrapped them so they look better to sell.
