Experience

Head of Development

June 2025 - Currently

InOne

Inone is a comprehensive Digital Marketing and Management Platform focused on the golf industry. It specializes in automating key processes, managing the customer journey, and leveraging Business Data for golf clubs.

<https://www.inone.es/>

Tasks

Design and develop the new CRM based on REST APIs using Laravel 12, manage the tasks of myself and my colleagues, write documentation and mentor.

Technology

- PHP 8
- Mysql Laravel 11
- EC2
- S3
- Docker

Head of Development

September 2024 - December 2024

Cargestion

ANDA Spanish company specializing in logistics management and freight transport. It focuses on optimizing the supply chain with customized solutions, prioritizing efficiency, sustainability, and customer satisfaction..

<https://cargestion.com/es>

Tasks

The development team consisted of 4 people. We had a backlog that I prioritized and assigned, while balancing my time between designing and developing the new software platform, supporting the developers, reviewing their pull requests, and leading deployments.

Technology

- PHP 7, 8
- Mysql 5
- MariaDB 11
- Laravel 11
- EC2
- S3
- Docker
- Html / CSS / JS
- Bootstrap

Full stack developer

September 2023 - June 2024

Libnov

It specializes in developing technological solutions for information and document management. It focuses on providing tools that facilitate digitization, process automation, and document management in business environments.

<https://es.libnova.com>

Tasks

I was part of two teams. In the first, I made corrections to the legacy codebase. Then, I created a file indexing service. Later, I was tasked with documenting microservices technologies and designing a future version of the legacy codebase.

In the second team, I focused primarily on bug fixes and improvements to one of the products. I also designed a back-office extension to connect it to a project management system.

Technology

- PHP 7, 8
- Mysql 5
- Phalcon
- Code Igniter 3, 4
- Elastic search
- Red Mine
- .Net Core 8
- View 3
- Docker
- Html / CSS / JS
- Bootstrap

Team Leader

August 2021 - September 2023

Multisafepay

Financial technology company specializing in online payment solutions.

https://www.multisafepay.com/es_es

Tasks

I was responsible for leading the backend development of a new product, which was a monolith, creating and implementing tasks, environments, rules and code quality tools, pipelines.

Technology

- PHP 7, 8
- MariaDB 10
- Postgresql 15
- Docker

Full Stack Developer

March 2019 - June 2021

Lineten

We specialize in empowering quick-service restaurants (QSRs) and foodservice brands with cutting-edge technology solutions designed to meet the evolving demands of the industry. Founded in London, England, and with offices worldwide, we collaborate with foodservice companies to optimize their operations, enhance the customer experience, and drive growth through innovation.

<https://www.lineten.com>

Tasks

I had two stints in this role. During the first year, I worked as a front-end and mobile developer. I was responsible for creating the new back-office front-end and an application for a delivery driver.

The second part was purely back-end: we have different integration services with providers.

Technology

- PHP 7
- MariaDB 8
- Go
- Vue 2
- Vuetify 2
- Google Maps
- Open Street maps

- Mapbox
- Graph hopper
- Leaflet
- Android
- Cordoba
- Html / CSS / JS

Full Stack Developer

December 2015 - December 2018

Lionline

It specializes in providing solutions for the online casino industry, emphasizing fun and teamwork as core values. It positions itself as a strategic partner for those looking to enter or grow within this sector.

<https://www.lapalingo.com/en>

Tasks

Maintenance and development of REST APIs, front-end maintenance, and addition of back-office functionality.

Technology

- PHP 5, 7
- MariaDB 6
- Symfony 1.4, 2.0
- Slim Php 3
- Material Design Lite
- Html / CSS / JS

Full Stack Developer

July 2013 - December 2015

Source works

It offers a variety of services, including digital transformation consulting, custom software development, and automation solutions.

<https://www.quellwerke.de>

Tasks

At this company, I've performed various tasks using different technologies. A typical CMS project can last from one week to one month, and I usually worked alone. However, for Phoenix Webmail, I worked on a team of three for nine months, and for the Alexander Maier app, we were also a two-person team for nine months.

Technology

- PHP 5
- Mysql 5
- Zend Framework
- Typo3
- Wordpress
- Cordoba
- Windows Phone 8
- Windows Universal App
- Bootstrap
- jQuery Mobile
- ExtJs
- Pimcore
- Joomla
- Html / CSS / JS

Full Stack Developer

November 2012 - June 2013

Keepunto

It is a virtual platform aimed at young people so that they can be introduced to the culture of effort and responsible consumption.

[keepunto en webarchive](#)

Tasks

My main tasks were related to back-end development, although I sometimes handled front-end tasks, bash scripts to export from the database to CSV files, and internal applications for the servers.

Technology

- PHP 5
- Mysql 5
- EC2
- Java
- Html / CSS / JS

Full Stack Developer

February 2012 - October 2012

Avalon PR Plus

A team of professionals, creatives, journalists, account executives, social media experts and Online/Offline Marketing specialists.

<https://avalonprplus.com>

Tasks

My main task was to design and develop a back office for the online media outlet's publishing company. <https://www.europneus.es/> I also helped design and implement online marketing techniques .

Technology

- PHP 5
- Postgresql
- Bootstrap
- Html / CSS / JS

Front-end Developer

September 2010 - February 2012

Digidis

Global solutions for digital gaming and the distribution of lottery and betting products through digital channels.

<https://es.linkedin.com/company/digidis>

Tasks

Front-end maintenance of <https://serviapuestas.es/> Creation and maintenance of personal data management tools

Technology

- PHP 5
- Mysql 5
- jQuery
- Html / CSS / JS
- Apple Webobjects
- Java 1.5
