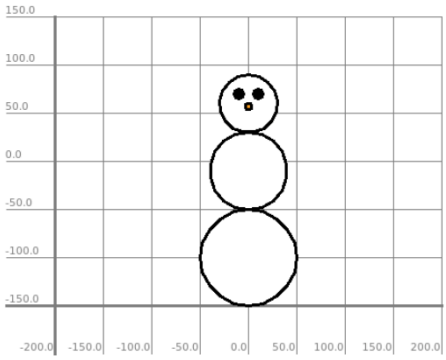
Snowman Art!



Avon Coders

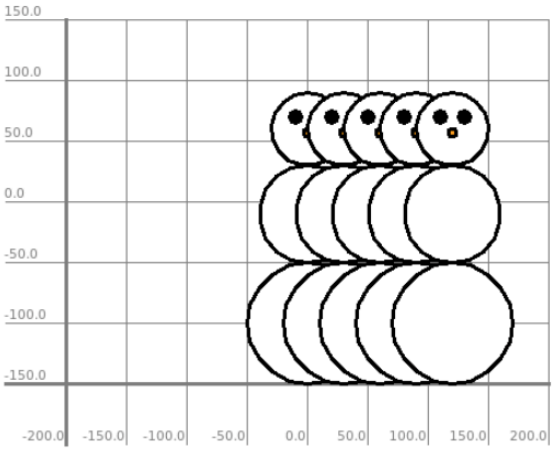
April Workshop Notes

https:/avoncoders.neocities.org

The snow may be mostly melted, but don't fret. Today, we'll be using Python & Turtle Graphics to draw our snowmen. There are **two** challenges to try!

Challenge 1: Draw a snowman like the one in the above picture. There are grid lines with coordinates to help you figure out where to draw stuff

Challenge 2: Make your code better so that it can draw an army of snowmen standing in a line. Waiting for a snowcone, I guess? *Do not copy and paste your code a bunch of times! There are better ways…*



Here's your starter code. Fork it and start coding!
