

Principal Action Plan

I am seeking my Minnesota K-12 Principal License. In my current position I am able to focus on communication, diversity leadership, monitor student learning, instructional management, and organizational leadership. I do this through communication with parents and on social media, working through various COVID procedures, scheduling, working daily with academics, working with trauma, being the APEX coordinator for the district, and working closely with our high school principal to problem solve situations.

In order to become a well rounded administrator, I would like to spend a significant amount of time focusing on culture, curriculum, policy and law, community relations, and values and ethics. These are some of the areas that I do not have as much experience. I am excited to work with the principals at all levels to try to accomplish experience in these categories.
