How Could I Create The World's First One Person Loading Kayak Carrier?

In thinking about back what got me to this place was an adoration for tinkering. I was forever discontent with the manner in which things were and I constantly needed to improve something less demanding or.

Advancement Out Of Necessity For Fishing and Kayaking Transportation

In my grown-up life nothing extremely changed, so when I begun kayak angling years prior and acknowledged that it was so difficult to get a kayak up over the top of the vehicle or SUV, I knew there must be a superior way. I went to Harbor Freight and began to construct a trailer, which I did, yet a trailer wasn't the ideal arrangement as you need to store them, they have parts that can turn sour, tires that can have victories, plates to pay for, and challenges with stopping them.

Where Can I Buy A Better Kayak Roof Top Carrier Online?

I kept searching for a superior arrangement, so I scoured the web searching for something that made my life somewhat simpler. Nothing I found in that look appeared to hit the stamp. I had this thought in my mind and I figured I would simply need to make something myself. It took a booked family outing to Florida to inspire me to begin.

The resort we booked didn't permit trailers and I needed to have the capacity to take my kayak to do some angling as I'm not by any means a fanatic of lying on the shoreline. My first stop was a trek to the nearby tool shop where I purchased the materials I expected to begin constructing the vision that I found in my mind, which was of a stacking framework that could without much of a stretch be put on most SUV's or vans. It likewise should have been effortlessly removable to have the capacity to get in the carport.

Making A Simple Roof Rack Kayak Loading System, That One Person Can Use

I needed to have the capacity to anchor my kayak without slithering up over my truck. All the tying should have been done on the ground before the kayak went up. On February first of 2017, I begun what might turn into the EZ Rec Rack. My better half probably had a sense this was something and with some support from her, I started taking a shot at the rack in my carport.

What Is The EZ Rec Rack Kayak Loader Made Out Of?

By February fifteenth I had a working model. Since I could weld steel, the main model was made out of this material. I immediately understood this was too substantial and not salt water amicable. To hit the check, it must be something that was light enough to where it didn't overload the cross bars without anyone else and could hold up to the components. Powder covered aluminum was the arrangement and what they are made out of today.

Helping Outdoorsy People Like Myself Is Our Passion. Our Aim Is To Be The Industry Leader In Roof Top Carriers For Kayaks and More

I was encouraged to complete a patent hunt, which I would not like to do as I was certain there was something on the planet like this and I would not like to spend the cash. The pursuit demonstrated that there was not at all like it! Around 11 months after the fact I had a US patent. From that point forward, I've been tweaking the rack to make it the ideal stacking framework. I am presently prepared to impart it to the world in plans to make others' lives somewhat simpler, much the same as mine.
