

# AP COMPUTER SCIENCE A

## REVIEW

**INTRO:** We hope this review helps you study for the AP Computer Science A test on Friday, May 17th! This is an open study guide, so anyone can upload their study materials (notes, quizlets, etc.). If you upload anything, please read the guidelines below. Please don't delete what others have uploaded. If you have any questions, please DM the officers.

## UPLOADING GUIDELINES

If you want to upload anything to this study guide, please follow the guidelines.

1. Please try to keep your content organized. Headers, subheaders, and bullet points are all very helpful. Also, try to give your content an informative title, so people know what your information is about.
2. If you want to upload **anything longer than a couple pages of text**, please upload the content to a separate file, and then create a sharable link. A tutorial describing how to share google docs can be found [here](#).
3. Please add your content to the table of contents above
4. Please don't edit or delete what others have contributed! Small grammar and spelling corrections are okay, but please don't delete whole paragraphs or links. If something seems incorrect, leave a comment instead!
