

[State says the deer count is down, but farmers and ranchers are still hurting](#) November 13, 2024 Hawaii

Maui News

... As a result of a fencing program by private landowners and the state, Haleakala Ranch president Scott Meidell is beginning to see the return of green sprouts of grass in some pastures denuded by axis deer ... based on recent heat sensor technology used in aerial flights by helicopter and drones, deer populations are significantly less than they were five years ago, and the current estimate for Maui is 34,000...
