Do It Craft!

How to make a 2-Liter SIP (sub-irrigated planter)

To learn more visit us at: greenroofgrowers.blogspot.com and [The Slinging Seed](#) Design: Debbie Kung

Thoughts

- Small groups (3 max)
- Working at the class pace to allow for the design cycle to be introduced/taught. This is the main focus for the first cycle.
- The design cycle will be visible to them and some key actions at each stage.
- It has to be manageable - Your group is only allowed an end product that uses the maximum of 3 bottles.
-

Cycle 1 -

Opportunity - We have a lot of plastic drink bottles that are only used once. What can we do with them?
