

Walk Audit Reflection

- Was the walk pleasant? Was there any major inconvenience during your walk? Did you have any safety concerns?

-Were the drivers driving safely? Did you feel safe being close to cars? Did you observe drivers breaking traffic laws or driving unsafely?

-Did you have room to walk? At any point did you ever have to walk on grass or on the road to keep up with the group? Were the sidewalks a safe space to walk on?

-Was it easy to cross streets? Were the traffic signals working and/or efficient for walkers? Was there any trash or trees that were covering the streets?

-Was it easy to follow street safety rules? Did you have to jaywalk or do any risky walking? Was everyone around able to walk safely?

-If you had the power to transform the area to make it safer for pedestrians, cyclists, people taking public transportation- what would you do, and why?
