Subject: Star Wars Trailer made by AI

"A.I. is just hype, it won't really affect my business"

I hear people say...

Do I agree?

Let me put it this way

if a guy can recreate an entire [Star Wars movie trailer](#)
on his laptop, in an afternoon with

- no actors
- no script writers
- no narrators

also

- no cameras

Do you think A.I. will affect our [video making*] industry? - replace with your industry

For sure!

Most jobs WILL become redundant.

It will be tragedy for most and triumph for some.

You chose how you react to this, most will ignore it until it's too late.

If you want to take the first step, check out the A.I. Media Machine,

Cost?

\$1 during the grand opening special.

"Can A.I. be used for video?"

YES,

E 4 -

Subject: 5 finished assets, 180 seconds, \$1

Today I set a **3-minute timer** and let **AI Media Machine** loose.

Before it beeped I already had:

- 3 faceless videos (script, avatar, voice - done)
- 2 YouTube thumbnails (one with my face swapped in)
- 1 logo for a client project

One dashboard. No prompts. No filming.

What else lives in there?

- **Script-to-Video** that turns sentences into full videos
- **Thumbnail maker** with face-swap that's borderline addictive
- Voiceovers that don't sound like 1995 robot-radio
- Full ebooks when you need a lead magnet, fast
- Logos + social posts on tap

- Music that won't get you copyright strikes

My friend Szilard built this. Been making templates for 16 years, now he's all-in on AI.
