Mechanical	5
1st Year Representative	5
Selena Yueran Li	5
2nd Year Representative	5
Rachel Claire Lynne Pittman	5
Aidan Stefan Principe	6

Board of Directors Representatives

Electrical and Computer Engineering Representative

Lisa Qian

Voter Statement:

I believe accountability and service to the engineering student community are key pillars that must be upheld by EngSoc, and I hope to translate the voice of ECE students and maintain these pillars as a board of directors representative. Having worked with EngSoc before as a project director I believe I can translate my experience to support the best choices.

Platform:

Ege Feyzioglu

Voter Statement:

Over the past few years being involved with EngSoc in various project director and committee roles, I've noticed how important it is to have Board of Directors members willing and able to fight to protect the rights of students. Over those same years, I've picked up experience interacting with faculty and outside groups, interacting with my fellow Skuligans, and I'm now able to be a good representative and advocate. I hope you vote for me! Thanks <3

Platform:

Internal Representatives

Fourth Year Chair

Erika Narimatsu

Voter Statement:

Heya everyone! I'm Erika, a Mech 2T3+PEY, and I'm running to be Fourth Year Chair to ensure that we all get the memorable sendoff experience we deserve after getting through 4+ years of engineering. Fourth Year Chair is responsible for helping organize the Iron Ring Ceremony (and related *shenanigans*), as well as

communicating any key information for graduating students, such as grad photos. I've had a lot of experience in Project Directorships, EngSoc, and other extracurriculars which showcase my skills in advocacy, event organization/logistics, and keeping up to date on my email inboxes!

Platform:

Class Representatives

Civil

1st Year Representative

Rocklen Jeong

Voter Statement:

Platform:

2nd Year Representative

Dana Bou Saab

Voter Statement:

Hello Civ Seconds! My name is Dana and I would love to be your class rep for this year! I promise to work to make things better for you all!

Platform:

Materials Science and Engineering

PEY Representative

Raysa Dyczok

Voter Statement:

Howdy yall! I'm Raysa (I hope you at least recognize my name) and I'm running to be your PEY rep this year! As class rep I want to make sure that we can stay

the close-knit class we are, even when we aren't taking classes together. I also want to ensure that we are represented in discussions within MSE club, and that our concerns about PEY are properly heard (even if the pey office is being silly).

I also want to ensure that we are represented in discussions within MSE club, and that our concerns about PEY are properly heard (even if the pey office is being silly).

Mechanical

1st Year Representative (2 positions open)

Selena Yueran Li

Voter Statement:

Hello, I'm Selena and I'm running to be one of your Mech First-Year Class Reps in the 2023 Fall By-Election! If elected, I will do my best to advocate for your interests in EngSoc, Class Rep meetings, and Faculty Council meetings. I also hope to work with Mech Club and other Class Reps to organize social and discipline events, such as pre-exam study sessions. In addition to rectifying the severe lack of therapy dog visits on campus, I aim to be a dependable Class Rep that my fellow 2T7s can rely on!

Platform:

2nd Year Representative (2 positions open)

Rachel Claire Lynne Pittman

Voter Statement:

I am excited to run for the position of Second Year Class Representative for the Mech Engineering Club. I am committed to voicing all of your course-related concerns, organizing engaging events, and creating a supportive community for all mechanical engineering students. I would like to enhance our academic

journey by ensuring that the delivery of all of our courses is fair to the students in order to help us collectively succeed in school. Let's engineer success together!

Platform:

Aidan Stefan Principe

Voter Statement:

I am thrilled to run for the role of 2nd-year Mechanical Engineering class representative. I recognise that each of you have your own unique passions and interests alongside your studies. Hence, I am eager to hear about them so that your ideas and voice can influence numerous events and initiatives throughout the year for Mechanical Engineering students. Moreover, I look forward to enhancing your experience and reducing your stress by ensuring your concerns are not only heard but also addressed.
