May 2025

Students and Parents:

Congratulations on accepting the challenge of AP Calculus next year! Both AP Calculus AB and AP Calculus BC require summer work to optimize (calculus term!) your success in the course. Please click on the links below to find the summer assignments for your specific course. Both documents are in PDF format and include the syllabus for the course on page 1 with the summer assignment on page 2. Both require a written as well as online component. Both require access to the textbook used in the course. For access before the school year ends in May, visit room C12, and for access over the summer, email Mr. Christy.

- [AP Calculus AB](#)
- [AP Calculus BC](#)

If you have questions about any of the summer assignments, please email me at gchristy@sylvaniaschools.org and I will respond within 48 hours. Please try to be as specific as possible.

Have a great summer and we look forward to getting to know you in the fall!

Greg Christy
Math Department Chair
