

## **(prospect name) Boost Your BJJs Business Visibility**

Your youtube channel is being outcompeted EVERY day.

Your views are becoming less and less after each video.

Soon you'll have to rely on spending money to earn money through ads just to keep your relevance.

Let's fix that with this one simple solution that I'm about to share with you before the storm comes and it is too late to save your channel.

If you simply add a free course next to your paid courses as a free trial, doing so will boost your credibility as a legitimate BJJ practitioner and will increase the likelihood of people buying your courses through watching your videos.

Look at Gracie University, one of the biggest BJJ gyms, they have tons of videos and courses on how you apply BJJ on the street and it is doing them wonders, they have risen to the TOP because of one action.

You can try and implement what I've told you by yourself, and it'll probably take you a good 3-6 months with many mistakes along the way, or we can work together and skip all of that struggle and get your audience up in a matter of weeks, not months.
