Tkinter Designer, Automate and beautify GUI creation 🍫

🐍 r/Python

Tkinter Designer is created to speed up and beautify Python GUI Experience. It uses well know design software called Figma. Which makes creating Tkinter GUI in Python a piece of cake.

Tkinter Designer

Description

Tkinter Designer was created to speed up the GUI-development process in Python. It uses the well-known design software Figma to make creating beautiful Tkinter GUIs in Python a piece of cake.

Tkinter Designer uses the Figma API to analyse a design file and create the respective code and files needed for the GUI. Even Tkinter Designer's GUI is created using Tkinter Designer.

https://github.com/ParthJadhav/Tkinter-Designer 🌐
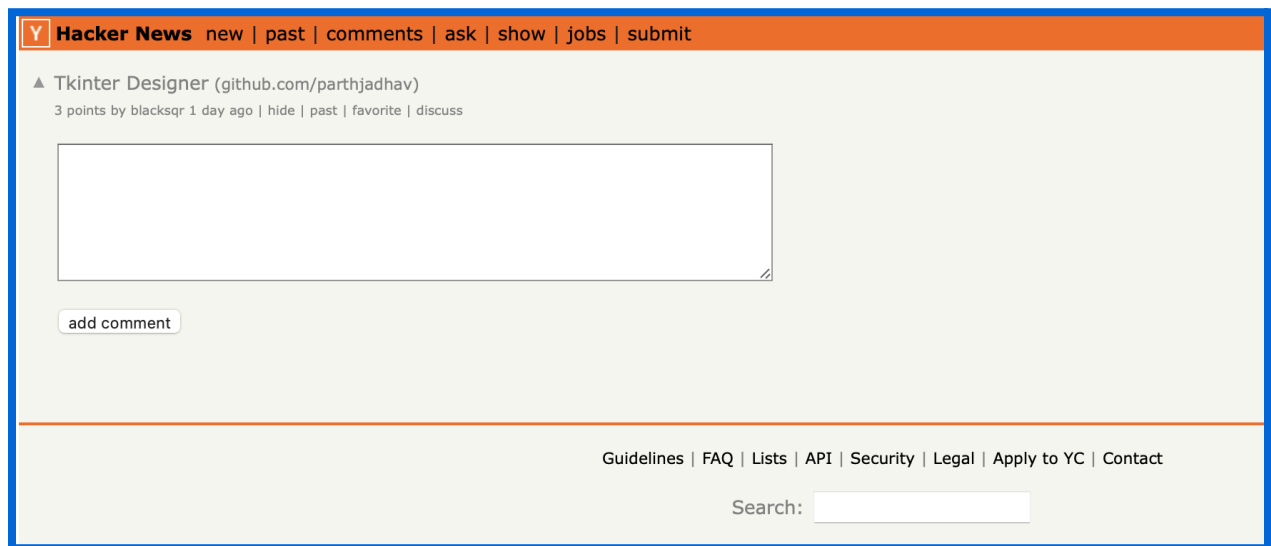

Advantages of Tkinter Designer

1. Drag and Drop Interfaces
2. Significantly faster than creating code manually
3. Ability to create more beautiful interfaces

RLH Something similar for Tk would be *awesome*.
