Quick introduction:

How to use it:

- Go into a private server on the map you want to practice molotovs on.
- Set cheats on. (sv_cheats 1)
- Copy the long “setpos text” and paste the text into your console.
 - **Click on the “setpos text” for pictures.**
- Take your molotov and throw!

All molotovs was thrown on 128 tick servers.

NOTE: I refuse to call it “incendiary grenade” since I can’t spell it without googling it. If you are triggered by this, this document is not for you.
