

Privacy Policy for Auto-Focus Input Fields

Last Updated: January 2025

Overview

Auto-Focus Input Fields is a Chrome extension that improves typing efficiency by automatically focusing input fields when you hover over them.

Data Collection

We collect **ZERO** data.

This extension:

-  Does NOT collect any personal information
-  Does NOT track your browsing history
-  Does NOT record your keystrokes
-  Does NOT monitor your typing
-  Does NOT send any data to external servers
-  Does NOT use analytics or tracking tools
-  Does NOT store any user data

How It Works

The extension operates entirely locally within your browser:

1. Detects visible input fields on the current webpage
2. Monitors mouse hover position
3. Applies focus to input fields when you hover over them
4. All processing happens on your device

Permissions Explanation

- **activeTab**: Required to detect input fields on the page you're viewing
- **scripting**: Required to inject the hover-detection script into web pages
- **Host permissions (<all_urls>)**: Required to work on all websites you visit

These permissions are used **ONLY** to provide the hover-to-focus functionality. No data leaves your browser.

Third-Party Services

This extension does not use any third-party services, analytics, or external APIs.

Changes to Privacy Policy

If we ever change how this extension works or introduce data collection (which we don't plan to), we will update this policy and notify users through the Chrome Web Store.

Contact

If you have questions about this privacy policy, please contact us through the Chrome Web Store support page.

Your Rights

Since we don't collect any data, there is no data to access, modify, or delete. The extension works entirely on your device.

Summary: This extension respects your privacy completely. It's a simple tool that makes typing easier, and that's all it does.
