Nestor Topchy's initial Pysansky tank proposal
(in classic Nestorese)
Aug 29, 2022

My dear friends,
 I'm looking for somebody who can create a simple app software program /post that can be shared as an open source instruction for transforming a T-72 tank into a pysanka. This can also be extended to helmets, cars etc...

 I'm envisioning a step-by-step pictorial program that goes through each color and pattern as it's added to the tank , same as we would a pysanka egg.

 I already have some preliminary sketches done to share withwhomever would like to collaborate to adapt the concept for electronic media .
There can also be a donate link to orgs assisting Ukraine. It should be translated into a number of languages .

The idea is it would help place Ukrainian culture on the world stage once and for all to provide evidence of our unique heritage, acknowledging
Ukrainian identity and sovereignty.

It will flabbergast and gobsmack Russian propaganda and garner media attention ...

In fact I'm amazed that so far I do not see pysansky or vishivanka registered as Ukrainian intangible cultural heritage , this needs to be done as well, post haste.

Nestor.

❤️ ❤️
