

Title: Corrosion of Reinforcing Steel in Concrete & Strategies for Mitigation

Date: 06/13/2023

Provider: American Society of Civil Engineers (ASCE)

Instructors: Jorge Costa, PE

Hours: 1

Class Type: Face to Face

City: Lantana

State: Florida

Description:

This course will cover factors affecting corrosion of infrastructure, including reinforced concrete. The course will discuss corrosion initiation, progression and failure of structures affected by corrosion. Measurement techniques to help identify corrosion and the root causes will be covered, as well as available technologies and strategies for corrosion avoidance, mitigation and control.
