

Coordinator: Daniele Scasciafratte

Why

Meta

The goal of this working group is to track and answer the broad questions we have around overall, program-wide topics, specializations and handle recognitions.

Community Leadership

The goal of this working group is to create a specialization track for Community Leadership, for Reps interested in community building and organizing, who are interested in growing their leadership skills and who want more support for building and organizing Mozilla communities around the world.

Situation

The Meta WG need to know by the reps:

- The specializations for reps, ex: the skills that another reps need to improve their community
- How to join these specializations for the reps, ex: evaluating their curriculum

The Community Leadership WG need to know by the reps:

- What is the leadership for him
- Their curriculum as volunteer
- Their engagement in that specializations
- Their are available as mentor for that specializations

Considerations

Is obvious that a union on the same survey is important for to be not annoying to reps and collect all that information in an unique place.

Also that informations are the same and useful for both the WG.

What we have to do

Meta WG:

- Evaluate the Leadership survey and add their questions on it

Leadership WG:

- Evaluate the questions from the Meta WG

Together:

- Confirm the questions

- Organize that questions
- Send the survey to all the reps

Milestone

- Collect all the data from all the reps
- Access to all that informations
- Write a recap about that datas - TBD how
