

Solar Eclipse 2017 - add your story below...

[20 patches ordered](#) - Order#:4601112 - \$49.69

10 patches ordered - Order#:4618301 - \$28~ 9/6/17

The requirements to earn the BSA 2017 Solar Eclipse patch are simple:

1. Tell us the location you where when you viewed the total eclipse or the partial eclipse.
2. Describe what method you used to safely view the eclipse.
3. Tell us about what you saw and felt during the eclipse. Post your comments and eclipse photos on social media with the hashtag #BSAEclipse2017 and @bsancactroop291 and email your photos to troop291.photos@gmail.com.

The crickets sang, the crowd cheered, the temp fell, it looked like sunrise in all directions on the horizon, Venus was visible. Awesome event! George Goldsmith and Alan Nelson drove 514 miles to Maryville TN into the total eclipse zone. -Alan Nelson

What was your story? Enter it below...

I learned about "firmament"...

My brother and I stayed at home to watch the eclipse. We used solar glasses and binoculars to watch the eclipse. The temperature fell and sunlight was watered down as the moon covered the sun. -Aamir Ghadially

I watched the solar eclipse in my backyard. We use solar glasses, solar binoculars, and a contraption we made to see the reflection of the sun. Everything seemed to become quieter, and the temperature dropped. -Taha Ghadially

I went to the Gaithersburg Observatory with my brother Tyler. There were lots of people there. We shared eclipse glasses from NASA that were handed out. I saw the moon move in front of the sun and we saw eclipse shadows. It was cool! Gavin Johnston
