Kindergarten: How to Use a Clever QR Code to Log Into Chromebook
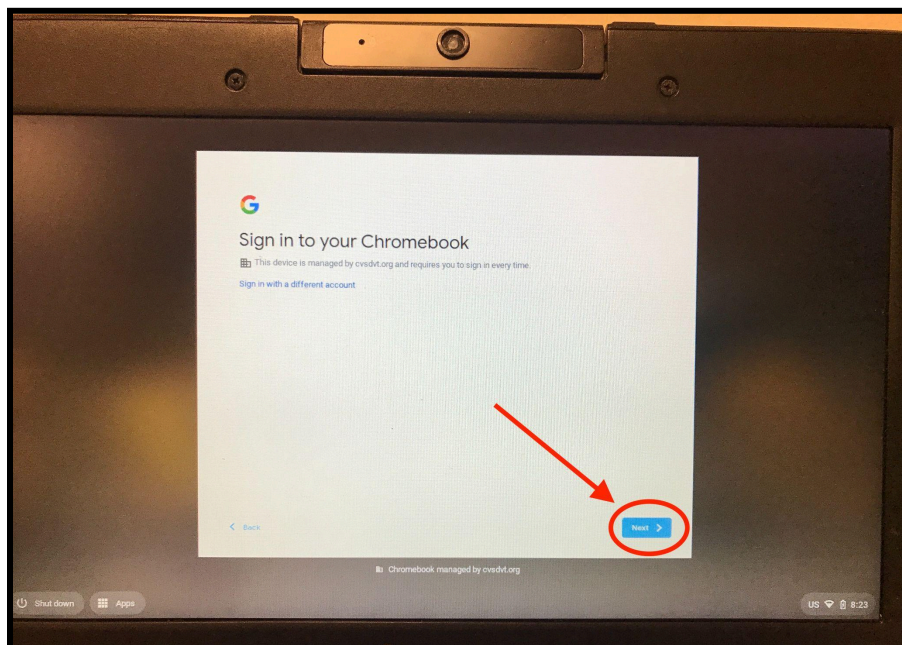

The Clever badge allows students to hold up a physical badge to their Chromebook's webcam to get logged into their Google account. This will also log them into other programs they use.
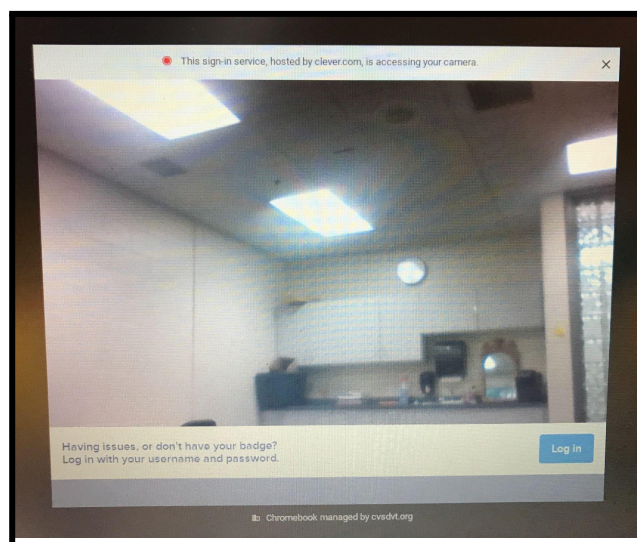

Here's a quick video of how it works.

Please note: This serves as a login to the Chromebook and a student's Google account, the badge needs to be kept secure.

## Steps for Logging In Using a Clever Badge

1. Turn on the Chromebook and click **Next**.

2. The Camera is activated.

3. The student badge is held in front of the camera. Once the code is read- and this happens quickly- a checkmark is displayed and a box is displaying indicating Clever is loading.

Student name displays here.

(Note- Students who have never logged in to their Google account will have to accept the terms of service before proceeding to step 4.)

4. Finally, the student is brought to their desktop. This is the portal page, where they can access their programs like Seesaw.

5. Students then need to properly logout or shutdown the Chromebook.
